

# Skrá yfir íslenska fugla

## List of Icelandic Bird Species

Staða í árslok 2009. – *Status at end of 2009.*

Reglulegir varpfuglar eru **feittraðir**. – *Regular breeding birds are listed in bold.*

Í öðrum dálki er íslenskt heiti og í þriðja dálki er latneskt heiti. – *In the 2nd column is the Icelandic name and in the 3rd column the scientific name.*

Í fimmta dálki eru upplýsingar um stöðu tegundarinnar hér á landi (sjá "Skrá yfir íslenska fugla til 2005", fylgirit með *Blika* 29). – *The 5th column ("Cat") gives the status of the species according to the AERC category, see the AERC home page).*

"F" í sjötta dálki merkir að tegundin er sjaldséð og eru menn beðnir senda upplýsingar um fugla sem þeir sjá af þessum tegundum til Flækingsfuglanefndar. – *The "F" in the 6th column means that the species is rare and records should be sent to the Icelandic Rarities Committee. Postal addresses can be found on the AERC home page).*

Í síðasta dálki er fjöldi flækingsfugla (einstaklinga), sem sést hafa til og með 2009. – *The last column ("No.b.") gives the number of individuals of rare species that have been seen to end of 2009.*
